S2S Connect

Digital Dynamics Software

EASILY ADD THE NEXT GENERATION
SYSTEM TO SYSTEM PROTOCOL (S2S) TO
YOUR GAMING SYSTEM

S2s is an industry open standard that allows casino operators to easily connect all of their systems together to share information.

Our S2S Technology enables:

- Synchronous and asynchronous support
- Intellisense support to simplify and facilitate your S2S implementation
- Support for multiple development environments including (C, C++, C#, VB.NET and any Win32 development environment including (Visual Basic, Visual FoxPro, etc)
- Pluggable network transport layers
- Client & Host Simulators
- Sample Code (Available in Multiple languages)
